

SUSPENDED METAL CEILINGS

SPECIAL COLOR COLLECTION CATALOGUE

www.trec.it

We produce metal ceilings for any type of environment: Offices, airports, stations, schools, shopping centers, buildings, industrial, sports centers, hotels, boats

SPECIAL COLOR COLLECTION

We can make false ceiling panels in special finishes that faithfully reproduce the appearance of fabrics, materials such as stone, wood and much more. This catalogue wants to be a starting point to show the potential of the digital decoration of the panels.

TRE C products are CE certified according to the EN 13964: 2004 standard.

Our quality management system has also obtained **ISO 9001: 2015 certification** with RINA Spa for the activity of: **PRODUCTION OF METALLIC PANELS, WALLS AND FALSE CEILINGS.**

TRE C suspended ceilings are functional, sound absorbing, easy to clean and sustainable. The design is simple and pleasant in any installation context.

BENEFITS

Beautiful aspect

Our special designs are produced with the most sophisticated printing technique for fine details, unique real effects and brilliant colors.

Acoustic comfort

Perforated planks and tiles boast the best levels of sound absorption, which can be further increased with the addition of special thermo-adhesive sound-absorbing mat.

Simple cleaning

Due to its ease of cleaning and washing, metal false ceiling has obvious benefits also in terms of hygiene.

The painted surface of the panels does not undergo alterations due to humidity or dirt and is therefore the ideal solution for environments such as hospitals, offices, shops, showrooms and airports.

Functional accessories

All our metal false ceilings are completed by a suspension system specially designed to ensure ease of assembly and the quality of the final result.

Quick installation

Panels and accessories are designed to ensure quick and easy installation.

The adjustment and alignment operations are quick and intuitive and it is always possible to disassemble the panels for installation corrections or the need for access to the plenum.

Personalization

In addition to standard products, for specific aesthetic or functional needs, we can make the panels completely to customer specifications.

The customization can also be related to the size and the accessories for installation.
